Profile

Results-driven Cloud Engineer with a passion for architecting and implementing scalable, resilient, secure and cost-effective cloud solutions. Leveraging expertise in cloud technologies and infrastructures management to optimize performance, enhance security, and drive business agility.

Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya

July 2019 - June 2023

Bachelor of Technology - Computer Science and Engineering (CGPA: 7.55/10)

Indore

Certification

AWS Certified Solutions Architect

Proven expertise in designing secure, scalable, and cost-effective solutions on AWS, leveraging core services and cloud best practices.

Experience

VirtueCloud

Sep 2023 – Present

Cloud Engineer

Indore

- Effectively used AWS services according to project demands, customizing solutions to meet specific requirements.
- Managed Jenkins pipelines and agents, optimizing CI/CD processes and improving deployment efficiency.
- Implemented automation scripts using Bash, Boto3, Terraform, Jenkins, and Docker for seamless cloud operations.
- Added alerts on various services using Jenkins, ensuring proactive monitoring and incident management.
- Created dashboards on Azure to visualize key metrics and performance data, enhancing cloud resource management.
- Implemented CI/CD pipelines integrating GitHub Actions, AWS CodePipeline, and Jenkins to streamline development workflows.
- Contributed to database migration projects, showcasing expertise in data migration strategies, schema modifications, and writing migration scripts throughout the migration process.

Appledore Consulting Group

Sep 2022 – Feb 2023

Web Developer

Remote

- Accumulated information on various web development technologies.
- Utilized technologies like Javascript, NodeJs, ExpressJs, RestApi, MongoDB for projects.

Technical Skills

Languages: C++, Java, JavaScript, Python, SQL.

DevOps tools: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions.

Cloud Computing(AWS): Amazon S3, Lambda, CloudFront, ECS, ECR, EC2, Redshift, Glue, VPC, SNS.

Cloud Computing(AZURE): Storage Account, Az Function, Monitor, VMs, Dashboard, Container Registry, Container Apps.

Other Tools: Boto3, Mysql, Mongoddb, ELK Stack, Git.

Projects

3-Tier Architecture Implementation on AWS | EC2, S3, RDS, VPC, Networking, CloudWatch

- Designed architecture layout and component interactions.
- Configured networking and database settings such as VPC, Subnets, Security groups, and RDS.

Deploying a Containerized Application with CI/CD Pipeline | GitHub Actions, Git, Docker, Amazon ECR, ECS

- Configured github action for deployment of application on ECS.
- Created a CI/CD pipeline for automating Docker image builds, Store on ECR, and Deployment on ECS.

Real-Time File Sharing Application | HTML, CSS, Javascript, Node.js, Express.js, Websocket, Deploy on AWS

- Developed a real-time file sharing web application allowing users to share large files over the internet without storing data locally.
- Integrated Websockets to enable real-time data transfer between clients and the server.
- Deployed the application on Amazon Web Services (AWS) for scalability and reliability.
